

Correction to “Measurements of geomagnetically induced current in a power grid in Hokkaido, Japan”

S. Watari, M. Kunitake, K. Kitamura, T. Hori, T. Kikuchi, K. Shiokawa, N. Nishitani, R. Kataoka, Y. Kamide, T. Aso, Y. Watanabe, and Y. Tsuneta

Received 25 March 2009; published 9 May 2009.

Citation: Watari, S., et al. (2009), Correction to “Measurements of geomagnetically induced current in a power grid in Hokkaido, Japan,” *Space Weather*, 7, S05099, doi:10.1029/2009SW000484.

[1] In the paper “Measurements of geomagnetically induced current in a power grid in Hokkaido, Japan” by S. Watari et al. (*Space Weather*, 7, S03002, doi:10.1029/2008SW000417, 2009), Figures 3 and 4 were incorrect and are reproduced here.

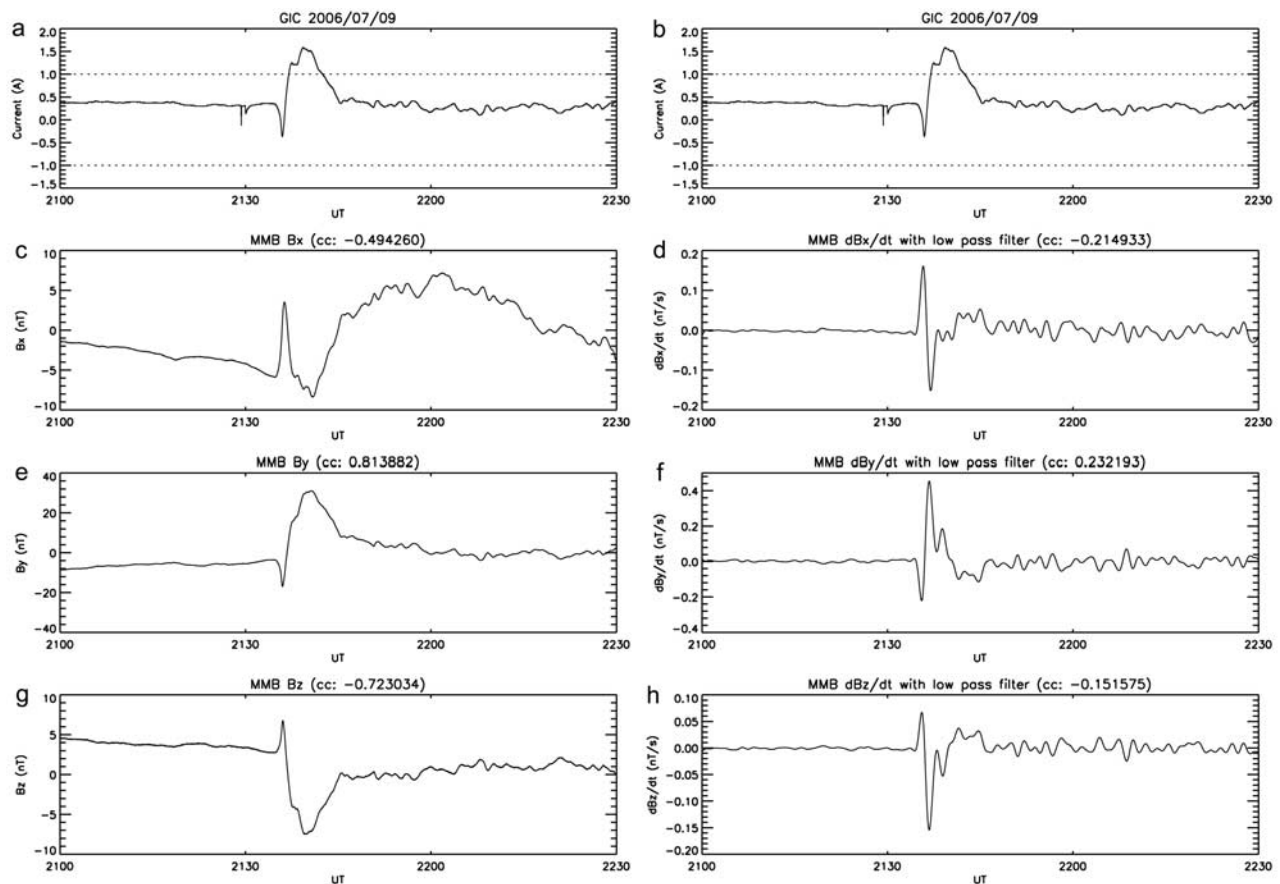

Figure 3. Same as Figure 2, except for a (a and b) GIC event associated with an SI at 2134UT on 9 July 2006 and the (c) Bx, (e) By, (g) Bz, (d) dBx/dt, (f) dBy/dt, and (h) dBz/dt components of geomagnetic variations at MMB.

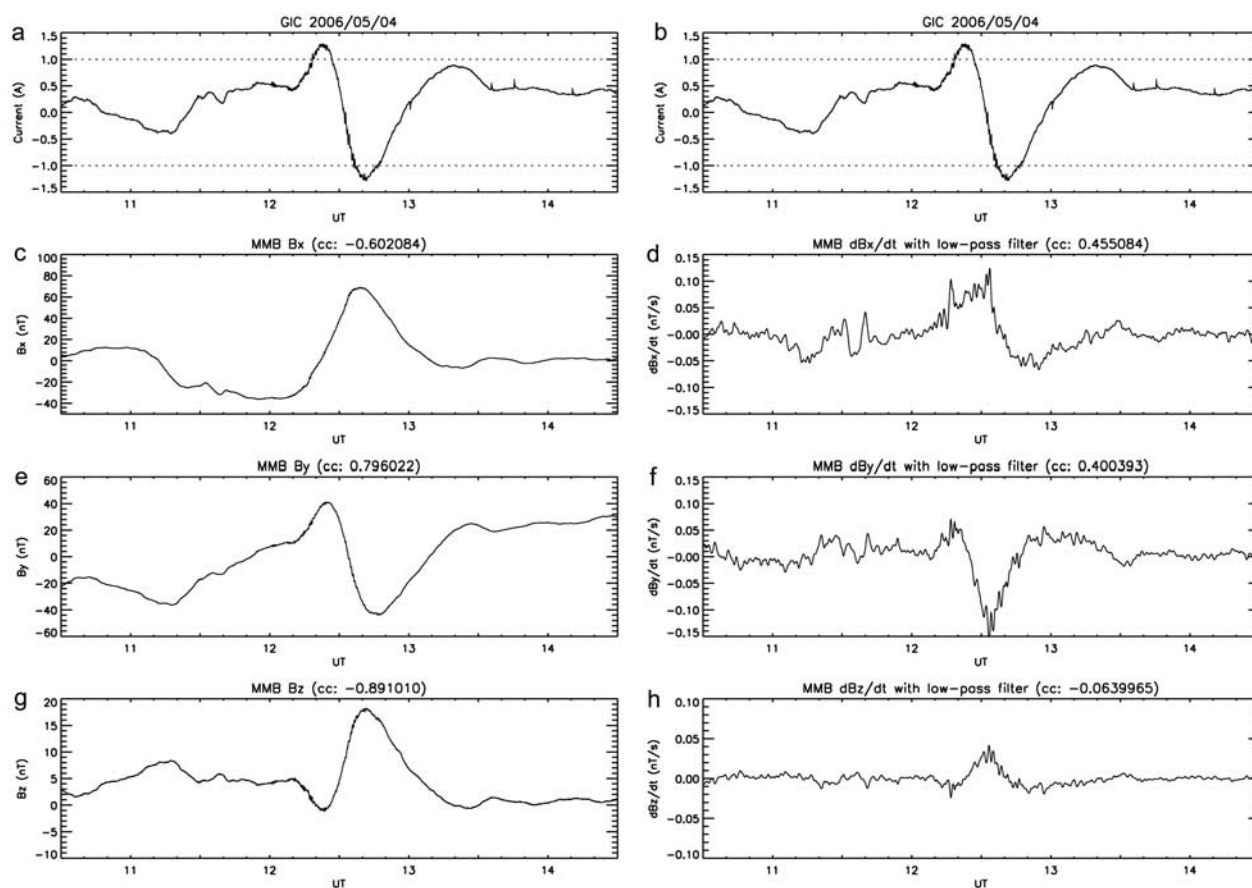

Figure 4. Same as Figure 2, except for a (a and b) GIC event associated with a middle-latitude positive bay on 4 May 2006 and (c) Bx, (e) By, (g) Bz, (d) dBx/dt, (f) dBy/dt, and (h) dBz/dt components of geomagnetic variations at MMB.
